

Arcadia Custom is a leading national single source supplier specializing in producing fine quality windows and doors for the Luxury Home Market. Our focus is custom Thermally-broken Aluminum, Thermally-broken Steel and Wood solutions.

Overview

- Financial Strength; Privately Held
- Proven Experience; 92 years in business
- Decades of sophisticated engineering and innovation
- Leading manufacturer that offers high quality custom Thermal Aluminum, Thermal Steel and Wood products for the Luxury Home Market
- 100% American Made; Nationwide Locations (*South Gate, CA; Tucson, AZ & Stamford, CT*)
- Commitment to the Design and Building Community
- AIA Continuing Education Courses
- Commitment to Sustainable Practices

Thermal Steel Differentiators

- Patented Global Thermal Steel Technology
 - Standard 10-gauge, 304 Stainless Steel that never rusts (*typically an upgrade cost with other manufacturers*). Click on this link to learn more on our extremely unique manufacturing process. <https://arcadiacustom.com/steel-technology/>
- Precision Accuracy - Our patented laser cut process ensures dimensional accuracy and eliminates corner welds.
- Shortest industry lead-time - 16-20 weeks
- American Made product (*in Tucson, AZ*)
- Factory Glazed to reduce handling and installation time
- Factory Finished Paint with no upcharge for custom color
- Superior Energy Performance; Thermal break is the largest in any steel window and door category and helps provide the greatest distance from exterior metals to interior metals. Creates better performance in extreme heat and or cold climates.
- Best warranty in the business; 20 Year Warranty -<https://arcadiacustom.com/wp-content/uploads/2020/05/Arcadia-Custom-Warranty-Thermal-Steel.pdf>

Thermal Aluminum Differentiators

- Diversified Product Line has significantly more breadth to it over the competition
 - In every category we have two or more product offerings
 - Narrow sight lines
 - Non-Impact and Impact
 - Large Format
 - Wide range of configurations and options for glass, spacers, sills, screens, jambs, muntins, hardware
- Best Steel Look product on the market
 - Narrow 2 ¼" frame depth
 - Ability to mull components to each other with the narrowest of sightlines to create seamless window and door walls of glass.

- Perfect choice among architects for cutting edge, clean contemporary large 1-lite designs to let in light and frame beautiful broad views or for the eloquent traditional style of Steel Look designs.
- Nearly indistinguishable from real thermal steel products
 - Retain many of the features and aesthetics of the classic original steel products: our 13/16” beveled muntin SDL that simulates the look of original “putty” glazed windows, glass stop on the exterior flat stop and SDL on the interior, the same as a real steel window, and the addition of a lock box synonymous with traditional steel doors on the swing doors.
- Completely customizable plus there’s a price advantage over real steel windows and doors. For value engineered jobs, we can effectively combine our T225 Thermal Aluminum products with our wide patented offering of Thermal Steel products, allowing for a truly transformative degree of design flexibility.
- American Made product (*in South Gate, CA and Stamford, CT*)
- Wide variety of sizes, high performance glass options and configurations, all of which are NFRC tested with low U-value ratings for reduced energy consumption.
- In-house Finishing (both Paint and Anodize)
- Factory Glazed to reduce handling and installation time

Wood Differentiators

- Vast variety of designs, distinguished wood species, distresses, textures and finishes
- Windows and Doors (*including interior doors*) that fit a broad array of architectural styles, some include Spanish Colonial, Tuscan, Craftsman, Tudor, Southwest, Contemporary, Mediterranean, Country, Baroque, Art Nouveau, Victorian, and Classical
- Raised Mouldings, traditional panel profiles, beveled glass, and radius door tops
- Factory painted and finished (*wire brush, vertical grain, sanded, etc.*) along with our classic, hand-scraped distresses, rubbed-oil finish (*weathered or burnished tones*) or our rich European Sikkens finish
- Completely pre-hung and assembled
- NFRC certified
- Offer Bronze Clad Windows and Doors, as well
 - Solid Bronze extrusions ensure lasting durability
 - Available in several Patina Finish options
- Offer sustainable modified timber, Accoya® wood that offers better thermal insulation properties than common hardwood and softwood species, while being more durable and having better structural integrity than the best tropical hardwoods. Ideal for coating, Accoya® wood can last twice as long as other wood materials, saving time, money and upkeep. Accoya® wood windows and doors are made to excel in external applications, even in challenging conditions.
 - 75% less shrinking and swelling
 - Easy to coat and sand
 - 70-year service life
 - 50-year above ground guarantee
 - 25-year below ground warranty
 - FSC certified
